

Nutrition & Diabetes Education

Since most of our patients only stay in the hospital for a short time, our dietitians and diabetes educators may only provide you with a brief introduction to your diet and or diabetes or may not get a chance to visit with you about your educational needs at all.

Please ask your physician for a referral to our out-patient services if you would like to meet with our dietitians/diabetes educators.

We Provide Education On:

- Diabetes
- Cholesterol, triglycerides
- Celiac, diverticulitis, diarrhea, other bowel issues
- Weight gain or loss
- Pediatric diet issues
- Enteral nutrition (tube feedings and parenteral nutrition (IV nutrition))
- Diets for kidney and liver disease
- Nutrition during pregnancy
- Nutrition in wound care
- Other nutrition topics
